MEETING NOTES

Welcome & Introductions – Tim Harms welcomed everyone and asked them to introduce themselves (sign in sheet attached)

Design and County/State Review Progress – Tim began with reporting that Bowman has submitted plans, received comments from the county and are ready to resubmit revised plans to the county. VDH has submitted comments as well, Bowman will respond to those this week. Nothing seems to require design changes but answers to clarifying questions. Doug Canady (VDH) says he expects to respond to the revised submissions in a matter of days. The hope is to wrap up submissions and reviews followed by VDH approval by mid-April.

Update on Deeds of Easement – Tim reported that ERM had made offers to owners for partial easements for the mainlines around the first of the year. 7 of 23 landowners have signed. More are expected to sign this week. About 4 properties are presenting issues that the county needs to address. A discussion of each of the 4 properties ensued.

Informing the Community – Newsletter was mailed last week. Sue Rowland asked if everybody received the newsletter. The answer was affirmative. A brief discussion of a ground breaking celebration ensued. It was suggested using the plant site and shoot for May or June.

Other Items – Whitely Wright announced that the Path foundation has a 12 months grant opportunity that might be suitable to an aspect of the project. Following discussion, Andrew Hopewell will approach the foundation to learn viability of a proposal for this project.

Future PMT Meeting – April 10.
